

PRODUCT OVERVIEW

Air-entraining agents:

- Berolan LP-W1 - SLS
- Berolan LP-W7 - SOS
- Berolan LP-W4N - SLS
- Berolan LP-W4DF- dust free
- Berolan LP-M1- micropores

Air-entraining compounds:

- Berolan LP-50
- Berolan LP-70
- Berolan LP-100
- Berolan LP-200
- Berolan HS-30
- Berolan LP-700 – starch + SLS
- Beropur – starch + SLS
- Berolan CO-5 – AEC for renovation mortar
- Berolan LP-80 – AEC for renovation mortar
- Berolan CLD 25 – dust free compound
- Berolan Micropor 50 – AEA for micropores

Air-entraining compounds for mortar based on lime, gypsum or cement.

Starch:

- Berolan ST-801
- Berolan ST-902
- Berolan F-1120
- Berolan ST-700
- Berolan ST-805
- Berolan ST-811
- Berolan ST-912
- Berolan ST-710
- Berolan ST-720
- Berolan ST-705

Other products:

- Berolan LPC-908 – AEC for concrete
- Berolan LPC-1 – AEA for concrete
- Berolan ST-100 – Stabilisizer
- Screecon – AEA with plasticizing properties
- Beroplus – workability aid
- Berotherm – binder for EPS
- Berolan DF-100 - defoamer
- Beroflow F10 – plasticizer
- Beroflow F50 – super plasticizer
- Berolan RT 1 – retarding agent
- Cellulose
- Tartaric-/Citric acid
- Lithium carbonate <100µm or <40µm

SLS – Sodiumlaurylsulfate/ SOS – Sodiumolefinsulfonate/ AEA – Air entraining agent/ AEC – Air entraining compound
