## Ravasol PVA-Dex

### Emulsion Polymer

#### Description

Ravasol PVA-Dex is an aqueous Polyvinyl Acetate homopolymer stabilized with Dextrin.

#### Applications

Ravasol PVA-Dex is a raw material for the adhesives industry. The high solids content / low viscosity enables high speed running characteristics and enables formulation adhesives with fast drying speed and clean film appearance. Typical adhesive applications are:-

- Re-moistenable adhesives (envelope flap type)
- Tube winding adhesives
- Book binding adhesives
- Paper / card box and carton manufacture

#### Properties

Property	Value
Solids Content	63 – 67%
pH	4 – 6
Viscosity (Brookfield 3/20)	500 – 1500 mPas
Minimum Film Forming Temperature	~13 deg C

#### Packaging

- 1000 litre Intermediate Bulk Containers at 1200 kg nett
- Can also be supplied in bulk truck

#### Shelf Life

When stored / un-opened in the original packaging and protected from direct sun light at 5-25°C the shelf life exceeds 6 months. If customer's storage conditions are not aligned to these parameters, then tests should be carried out to determine the shelf life under alternative and specific storage conditions.
